Project Summary: 03-202-554

Project Number:	03-202-554	Project Status:	Active	Grant Manager:	M Jones
Project Name:	City of Los Angeles Augustus F. Hawkins Wetlands Habitat	Project on Schedule:	Yes		

Project Details

Watershed:	Los Angeles River	Project Description:	Construct a freshwater marsh system with native vegetation in Hawkins park to capture and treat urban runoff and provide wildlife habitat. Will also serve flood control purposes. Multiple impairments in the LA River will be addressed. There is an existing trash TMDL and a nutrient TMDL in development.
Problem Statement:	With current and increasing stringent water quality requirements for urban runoff, there is an increased need to develop alternatives that meet or exceed requirements whiel enhancing nature, creating educational and recreational facilities, and improving the environment. The proposed project would demonstrate to a highly urbanized community the effectiveness of wetland habitats in meeting the new requirements.	Outcomes:	Stormwater-BMP Implementation The Goals of the project is to provide improvements to urban runoff water quality, Establish aquatic habitat in a heavily urbanized area and understand community, and Enhance flood protections with the area by providing supplemental surface water detention and provide public education regarding storm water management and wetlands.
